#9541961	12 Row 2 Pass 2 Flange
#40020885	12 Row 4 Pass 2 Flange
#40046710	12 Row 4 Pass 4 Flange
#40113590	12 Row 4 Pass 4 Flange

### The Remanufacturing Process:

- ◆ EMD Aftercooler cores are remanufactured by first completely cleaning the unit, then visually inspecting the unit for leaks while applying pressure to the core.
- ◆ All identifying leaking tubes are mechanically sealed.
- ◆ If the number of leaking tubes exceeds the OEM maximum, the “core” can be replaced.
- ◆ Upon completion of either process, a final pressure check is done.
- ◆ The Aftercooler is then completely dried, painted, wrapped and skidded for shipment.
